The Council of Europe will implement from 01 March 2023 to 29 February 2024 a Project on Strengthening human rights-based responses to treatment and rehabilitation of substance use disorder within criminal justice and prison settings in the South Mediterranean and supporting comprehensive continuity of care. In that context, it is looking for a Provider to provide consultancy in developing a policy document that addresses drugs and drug use disorder treatment in the prison settings in each of the four participating countries: Algeria, Jordan, Palestine* and Morocco. The work should be carried out in cooperation with the national working committees of the four participating countries which have recently been set up.

The MedNET Criminal Justice and Health in Prison project focuses on criminal justice (including arrest, police detention and pre-trial detention) and prison setting in the South Mediterranean countries and aims to address challenges related to the relatively high prevalence of drug use among people who are arrested and incarcerated and its consequences to the public health system, through applying a comprehensive drug treatment and rehabilitation approach based on human rights principles and supportive of continuity of care between prison and community. In addition, the project focuses on accessibility of treatment and care during all the stages of criminal justice procedures such as arrest and pre-trial detention. In 2022, five countries participated in the baseline feasibility study conducted by an external consultant with the support of the MedNET/Pompidou Group Secretariat whose objective was to assess the existing data on the drug situation in the criminal justice and prison systems located in these countries. Four out of five countries expressed the interest to participate in the second phase of the project.

In the course of its implementation, the other countries part of MedNET might be invited to contribute to the project with hosting study visits, providing consultants etc.
